

Ideation Phase

Empathize & Discover

Date	26 June 2026
Team ID	Solo
Project Name	ShopEZ – E-Commerce Application
Maximum Marks	4 Marks

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps the team step into the user's shoes, understand their goals and challenges, and design a solution that truly fits their needs.

Persona: Priya – Everyday Online Shopper (ShopEZ Customer)

A working professional in a tier-2 city who regularly shops online for clothing, groceries and household items, and wants a fast, trustworthy, and pleasant shopping experience.

THINKS & FEELS

- "I wish I could trust a small seller as much as a big brand."
- Worried about payment safety and delayed refunds.
- Wants a quick checkout without unnecessary steps.

SEES

- Ads for large marketplaces everywhere; local sellers barely visible online.
- Friends sharing screenshots of good deals on social media.
- Cluttered, template-like shopping apps with generic layouts.

HEARS

- Friends complaining about slow delivery and poor return policies.
- Family saying "just buy from the big apps, they're safer."
- Sellers promoting products directly on social media.

SAYS & DOES

- Compares prices and reviews across multiple apps before buying.
- Abandons the cart if checkout feels long or confusing.
- Tracks order status frequently after placing an order.

PAIN

- Generic storefronts that feel impersonal, not boutique-like.
- No easy way to judge if a small seller is trustworthy.
- Slow/clunky search when filtering by category (e.g. "Home & Kitchen").

- Confusing multi-step checkout with limited payment choices.

GAIN

- A premium, gallery-like browsing experience, not a generic grid.
- Fast live search and category filters that just work.
- Multiple payment options: Card, UPI, Cash on Delivery.
- Clear order status tracking from Pending to Delivered.

Persona: Arjun – Small Retail Merchant (ShopEZ Seller)

Runs a small clothing and accessories shop and wants to grow sales online without hiring a technical team or paying for expensive enterprise software.

Section	Content
What does he THINK & FEEL?	Anxious about competing with big online retailers; feels technology is complex and expensive.
What does he SEE?	Competitors already selling online; customers asking "do you have a website?"
What does he SAY & DO?	Manages orders on paper or WhatsApp; manually checks stock before confirming a sale.
PAIN	No single dashboard to see revenue, pending orders, and inventory at a glance.
GAIN	A simple seller dashboard with live KPIs, inventory CRUD, and order status management.

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

EMPATHY MAP CANVAS

Persona: Priya - Everyday Online Shopper (ShopEZ Customer)

A working professional who shops online regularly and wants a fast, trustworthy, pleasant experience.
