

User Acceptance Testing (UAT) Template

Date	26 June 2026
Team ID	Solo
Project Name	ShopEZ – E-Commerce Application
Maximum Marks	

Project Overview:

Project Name: ShopEZ

Project Description: ShopEZ is a full-stack MERN e-commerce application offering a premium, boutique-style shopping experience for customers along with a full Seller Dashboard for inventory, order, and revenue management.

Project Version: v1.0.0

Testing Period: 26 June 2026 to 2 June 2026

Testing Scope:

- ☐ User registration, login, and JWT-based authentication
- ☐ Product catalog browsing, live search, and category filtering
- ☐ Product details page (specifications and reviews tabs)
- ☐ Shopping cart with live price calculation and database sync
- ☐ 3-step checkout flow (Card, UPI, Cash on Delivery)
- ☐ User profile: address management and order status history
- ☐ Seller dashboard: KPI analytics (Revenue, Total Orders, Pending, Delivered)
- ☐ Seller inventory management (Add / Edit / Delete products)
- ☐ Seller order management (search by ID, update order status)
- ☐ Responsive layout across desktop and mobile devices

Testing Environment:

URL/Location: <https://shopez.onrender.com>

Credentials (if required): Test Customer- priya@example.com / user123; Test Seller – admin@shopez.com / admin123

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User registration with valid details	1. Go to Sign Up page 2. Enter valid name, email, password 3. Click Register	Account is created and user is redirected to login/home page	Account created successfully; redirected to homepage	Pass
TC-002	Login with valid credentials	1. Go to Login page 2. Enter registered email and password 3. Click Login	User is authenticated (JWT stored) and redirected to homepage	Login successful, token stored, redirected as expected	Pass
TC-003	Login with invalid credentials	1. Go to Login page 2. Enter incorrect password 3. Click Login	Error message displayed, login denied	Correct error message shown	Pass
TC-004	Search product by keyword	1. Go to homepage 2. Type product name in search bar	Matching products are displayed live as user types	Live search worked as expected	Pass
TC-005	Filter products by category with special characters	1. Select category "Home & Kitchen" from filter	Products filtered correctly; URL parameter properly encoded	Category filtered correctly, URL encoded "&" without breaking	Pass
TC-006	Add product to cart	1. Open a product page 2. Click "Add to Cart"	Product is added to cart and price total updates live	Cart updated and price recalculated instantly	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-007	Complete checkout using UPI	1. Go to Cart 2. Click Checkout 3. Fill shipping details 4. Select UPI as payment 5. Confirm order	Order is placed successfully and appears in order history	Order placed and visible in profile order history	Pass
TC-008	View order status as customer	1. Go to Profile 2. Open Order History	Correct order status (Pending/Shipped/Delivered) is shown	Status displayed correctly	Pass
TC-009	Seller adds a new product	1. Login as seller 2. Go to Inventory Manager 3. Click Add Product 4. Fill form and submit	New product appears in inventory list and customer catalog	Product added and visible in both dashboard and storefront	Pass
TC-010	Seller updates order status	1. Login as seller 2. Go to Order Manager 3. Search order by ID 4. Change status to "Shipped"	Order status updates successfully and reflects on customer side	Status updated and synced correctly	Pass
TC-011	Seller dashboard KPI accuracy	1. Login as seller 2. Open Analytics Panel	Total Revenue, Total Orders, Pending, and Delivered counts match actual database records	KPI values matched database records	Pass
...	...	...	...	...	...

Bug Tracking

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Seeded user passwords were not hashed correctly, breaking login for seeded accounts	1. Run database seeder using insertMany 2. Attempt login with a seeded account	High	Closed	Fixed by switching seeder from insertMany to User.create so bcrypt hashing runs correctly
BG-002	Environment credentials were exposed in git history	1. Inspect git commit history 2. Search for .env contents	High	Closed	Purged secrets from git history and confirmed .gitignore blocks future leaks
BG-003	Production build failed on Render due to missing dev dependencies	1. Deploy to Render 2. Observe build failure during npm install	Medium	Closed	Resolved using the --include=dev flag in the Render build command
BG-004	Category filter URL broke when category name contained "&" (e.g. Home & Kitchen)	1. Select "Home & Kitchen" filter 2. Observe URL and results	Low	Closed	Fixed by properly encoding query parameters in the URL
...	...	...	...	...	...

Sign-off:

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
